ATTENDANCE AND ABSENTEE POLICY

Regular school attendance is required by law and is necessary for good scholarship. A student's success in school relates directly to school attendance. For that reason, regular and punctual attendance is expected and required at TCA. Parents are teaching their children to accept responsibility when they help them arrive on time and be regular in their attendance.

State attendance laws in Florida mandate a student be in attendance at least 90% of a semester to receive credit for the semester. All absences count against this 90% minimum. TCA will not extend credit unless state instructional hours standards have been met. A student who is more than 10 minutes late to class is counted as absent. On rare occasions, travel plans or medical procedures may result in a student being absent. When an absence is anticipated, the parents are to inform the school office in writing at the earliest possible time prior to the absence. If a test or project assigned while the student was in school becomes due, the student will take the test or turn in the project before leaving school.
